Pat:

My responsibility as a U.S. Olympic Solidarity Coach, and the National Director of Strategic Analytics for USA Wrestling is to ensure the harmonious balance of our wrestlers; physically, mentally, emotionally, and spiritually in their dream to win Olympic Gold for our Country, and be Champions for Life.

Achieving strategically superior performance is an equation of many factors, but none as critical as the fact that a healthy America is a stronger America; our kids, our coaches, and our families deserve nothing less. More importantly, our Nations future depends on it!

Greco-Roman Wrestling is the oldest, and arguably the most dominant style of wrestling in the world. It was first contested at the modern Olympic Games in 1896, and is governed by the International Federation of Associated Wrestling Styles (FILA). The Sport of Wrestling and other Combat Sports have lived with mat related infectious diseases for over one hundred years. It is a fear that many wrestlers & their coaches have been lulled into denial, or even may have conditioned or rationalize to themselves; simply to get tougher, quit whining, or just "live with it."

In some respects, doing little to nothing has stood the test of time; however, with the rate new strains of antibiotic resistant infections are mutating, such as Community Acquired (CA-MRSA) where death has been a consequence. The slightest risk is unacceptable when it is your child, your loved one who dies when it could have been prevented.

It has been brought to my attention that the Germinator System you have created has been independently analyzed to eliminate 98.9% of incredibly concentrated Staphylococcus aureus. I applaud and "Thank You" for your vision and hard work in creating the Germinator System as an essential insurance policy to heal heart ache, and save lives.

Dare to Dream ... Expect to Win!

Hugh M. Suenaga
