Re: Germinator

Dear Daren:

As Head National Greco-Roman Coach for USA Wrestling and Team USA; I wanted to personally thank you for your vision and attention to detail in helping ensure the safety and well being of our Teams as we prepare to defend our first World Team Championship in United States history at Herning, Denmark.

So often, the little things go un-noticed or are taken for granted until it is too late; but I can assure you that at the World and Olympic Level; we take those things very seriously, as our people may train for 16 years or more for one shot at making an Olympic Team. It would be devastating to have the Team or an individual be disqualified at the last minute due to a contagious infection that with your product could have been avoided.

The Germinator you have created is far superior both in function and in professional appearance to anything we have ever used to date at the Olympic Training Centers. We require the strictest standards for training the best athletes in the world, and are currently putting to brutal use the Germinators we now have in our Olympic Wrestling Rooms both in Colorado Springs, and the USOEC at Marquette, Michigan. We anticipate submitting additional orders in the near future.

I know I speak for all our coaches, not only for our National Greco-Roman Program, but for the Men and Women's Freestyle Programs, and all who they may come in contact with both on and off the mat who will benefit from your work.

Thank you again for caring about the well-being of our athlete's, and the future of our Nations Dreams of being the best in the World!

Be Strong...

Steve Fraser
